

Turku 16.1.2017

## **Business acquisitions have resulted in significant players for the fire and rescue field, and a continuator has been found for Finnish companies with 125-years of operation**

Rauplan Oy, Veikko Nummela Oy and TR-Vesitykit Oy- led by the same owner.

In accordance with a deal made in December 2016, majority shares in [Rauplan Oy](#) were transferred to a company owned by Iivari Kalliomäki. The agreement made between the parties includes the transfer of the entire share capital to the new owner by a set deadline.

Previously, in February 2013, the company bought [Veikko Nummela Oy](#) in Kaarina. Veikko Nummela Oy was founded almost 50 years ago and manufactures, among others, Esteri fire pumps for fire and rescue vehicles. Eighteen months later, the corporate entity was strengthened through the acquisition of [TR-Vesitykit Oy](#), a manufacturer of fire fighting monitors for fire fighting and rescue vehicles.

The business acquisitions originated through the previous entrepreneurs' desire to move into retirement, and to find an owner for the companies who would be able to take their operations forward.

The corporate entity formed through the acquisitions represents very long-term and extensive professional skills in the field gained through 125 years of operations, as well as extensive specialist knowledge gained through the services and products and machinery manufactured. The main product groups are Esteri fire pumps, TR-Vesitykit fire fighting monitors, Rauplan fire couplings and nozzles, as well as Rauplan extinguishing equipment. The companies also import high quality specialized equipment and tools used in the field.

Veikko Nummela Oy, Rauplan Oy and TR-Vesitykit Oy will continue their business operations as separate companies, whilst sales, service, production and management activities will be integrated. The companies employ 30 workers at their factories in Turku and Kaarina and have an annual generated turnover of around 5 000 000 €.
